

Securing the Business World

Collaborative Partnership

Proactive Solutions

Balanced Strategy

Arsenal Security Group is focused on helping customers leverage security to enhance their core business. Our clients engage us to ensure they are conducting their business securely – between their business partners, suppliers, customers and employees.

We Secure Your Business

We work with our customers to integrate security into their business fabric. Through business focused consulting, regulatory driven compliance, to technology based assessment services, Arsenal Security Group is your trusted service provider.

The Arsenal Approach — Arsenal Security Group is a consulting firm that is focused on close client coordination and collaboration. From the initial meeting through the final presentation, an Arsenal Senior Partner will be your primary contact for all engagement activities. We proactively conduct weekly calls with our clients when engaged and meet with clients on a quarterly basis to review and understand their security posture—even when we are not actively engaged on assignment to ensure they are aware of new security risks and regulatory changes that may impact their business.

Our Consultants — Arsenal Security Group brings experienced staff with an average of over 10 years of IT Security experience across every major industry sector. Our consultants maintain ongoing training and are required at a minimum to maintain CISSP and QSA certifications.

Our Clients — Arsenal serves customers across the United States and Canada with our consultants located in over 15 major cities. Our clients look for Arsenal to provide innovative solutions that place their business needs first. Arsenal provides business-focused consulting for your IT Security and Compliance needs.

“Companies have an ever increasing demand to achieve and maintain compliance in today’s business world. These challenges are amplified with finding the right skills and expertise to understand and implement effective controls that are aligned with your business. Arsenal Security Group is your trusted service provider with the skills and expertise to secure your business in today’s world.”

*- Russell Teague & Mark Lippman
Founders of Arsenal Security Group*

Payment Card Industry Services

Service Offering	Description
PCI Assessment	QSA-certified assessors will assess all 12 control areas of the Data Security Standard Version 1.1, perform a gap analysis, provide a remediation plan as part of the Initial Report of Compliance, and deliver a Final Report of Compliance.
PCI Compliance Workshop	A PCI Security Workshop is a facilitated session led by a QSA-certified assessor and one of our Senior Partners to assist all functional business areas (IT, Legal, Marketing, Line of Business, etc.) to prepare for a PCI Assessment.
PCI Compliance Strategy	PCI Compliance Strategy provides interviews with key stakeholders, complete documentation of all business processes surrounding card holder data, to include all areas of data use and storage to produce your PCI Compliance Strategy.
PCI Assessment Planning	PCI Assessment Planning includes a thorough review of your company's current business processes that involve processing, storing or transacting card holder data to understand areas for improvement to achieve compliance.
PCI Remediation Services	Before, during and after assessment, Arsenal's experienced staff can provide you with the expertise and assistance in remediation and determining compensating controls for areas that are not compliant with DSS Version 1.1 requirements.

Business Security Services

Service Offering	Description
Business Security Health Check	Do you understand the current state of security across your business? The Arsenal Business Security Health Check will assess your current security posture and provide a detailed gap analysis against industry standards so that you understand the risks to your business.
Business Security Workshop	Need help understanding security and how to leverage it to help change your business? Industry security experts will work with you and your team in a collaborative workshop focused on understanding security as it relates to your business.
Corporate Security Training	Do you need to train your non-IT staff on relative security issues? Do your executives need a refresher? This multi-faceted offering provides custom security training modules on Security Policy, PCI, Regulatory Compliance and other topics designed for your business and audience.
Business Partner Security Management Strategy	Are you concerned about your 3rd party and business partner security posture and how it may affect your business? This offering will assist you in developing a comprehensive strategy in transacting business securely – between your business partners, 3rd parties, and customers.
Vendor / Supplier Management Strategy	Are you concerned about your vendor and supplier security posture and how it may affect your business? This offering will assist you in developing a formal plan to ensure vendors and suppliers maintain a minimum level of security compliance aligned with your business governance and risk management program.

Technology Assessment Services

Service Offering	Description
External Vulnerability Assessment	Internet Security Assessment is designed to provide you with a comprehensive review of your external perimeter environment across your technology architecture and your management processes. This will include a network scan and penetration test.
Internal Vulnerability Assessment	Intranet Security Assessment includes a comprehensive review of your internal networking architecture, component configuration analysis and an internal scan of your entire network.
Wireless Security Assessment	Wireless Security Assessment provides a comprehensive review of your wireless network architecture. This assessment also identifies rogue wireless devices that are attached to your network if your company policy does not allow wireless networking.
Application Security Assessment	Application Security Assessment is an in-depth analysis of your end-to-end application configuration and architecture. In addition, Arsenal can provide application code-level review for a detail analysis of your application source code.
Platform Security Assessment	Arsenal's Platform Security Assessment includes a detailed system review from a component configuration and system architecture perspective.

Regulatory Compliance Services

Service Offering	Description
ISO-17799 Compliance Services	Are you an international company concerned about security, risk and compliance? ISO-17799 Compliance Assessment is an industry adopted unified framework for performing risk & gap analysis to determine current level of compliance.
HIPAA Compliance Services	If your organization deals with healthcare information or does business with a partner that shares or exchanges healthcare information, you should consider Arsenal's HIPAA Compliance Services to review your level of compliance with the Health-care Information Portability Accountability Act which includes the HIPAA Privacy Regulations and HIPAA Security Rule.
FFIEC Compliance Services	Are you trying to achieve compliance with the mandated FFIEC Regulations for two factor authentication and systems logging? Our FFIEC Compliance Services will help you understand what is required and implement a repeatable process.
FISAP Compliance Services	The Financial Institution Shared Assessments Program (FISAP) is a groundbreaking consolidated standard for financial institutions and their business partners to evaluate current security posture and implemented security controls.
SOX-404 Compliance Services	Arsenal Security Group's SOX-404 Compliance Services are designed to provide your business with assistance in understanding SOX, assessing your progress, and helping you determine your IT key control requirements.
